META SWAP MET\$ WHITE PAPER

Exchange

MetaSwap is the decentralized exchange on BNB Smart Chain, created in 2023 and constantly growing. Its MET\$ token is the basis of the whole ecosystem. The smart contract has a 0% fee to facilitate purchase and sale exchanges.

Low Fee

MetaSwap runs on BNB Smart Chain, a blockchain with much lower transaction costs than Ethereum or Bitcoin. The trading fees are lower than other major decentralized exchanges too, so this makes it better for you.

Decentralized

Trade directly from your wallet app. (MetaMask - Trust) Unlike centralized exchanges like Binance or Coinbase, MetaSwap doesn't hold your funds when you trade you have 100% ownership of your cryptocurrency.

Earn

Earn MET\$ and other tokens for free with super high interest rates.

Stake MET\$, earn free tokens. It really is that easy. MET\$ holders are currently earning free tokens every week from new projects thanks to our launchpad and farming staking.

Earn trading commissions with farm and liquidity provider. Even if your trading pair is not supported on the Farms page, you can still earn trading commissions when you create or deposit with our liquidity provider. With each trade on your pair you will receive more LP-Tokens.

Lottery

All MET\$ holders will be able to participate in the monthly lottery and win more MET\$ tokens.

Everyone will be able to participate, just buy tickets by paying with MET\$ tokens.

For those who do not yet have our tokens, they can buy them directly on the exchange.

Liquidity provider

Through the liquidity provider each user can add liquidity to existing pairs or create new ones.

By adding or creating liquidity, the user will receive the LP-Tokens that he will have to import into his wallet.

For each exchange that will take place on the pair created by the user, he will receive other LP-Tokens as a fee which will be added to those already owned.

Launchpad

With the launchpad platform, each new token project will be able to create its own ICO/IDO by paying a small fee for the service.

In the creation you can set various parameters including:

- Token rate
- Soft cap
- Hard cap
- Start date
- End date
- Unlock date

He will also be able to put an image of the project, description and social links.

Furthermore, again through the App, it will be possible to create token lock contracts so that investors can receive the project tokens at a certain deadline, making a simple claim.

Buy / Sell Crypto

On the exchange we have introduced the possibility to buy and sell cryptocurrencies by credit card, bank transfer, Google Pay and Apple Pay.

This is to make it easier for novice users to buy and sell tokens and cryptocurrencies

NFT

With our NFTs you can win prizes or with the utility ones join forex trading funds to earn BUSD thanks to our Expert Advisor who works 24h/24

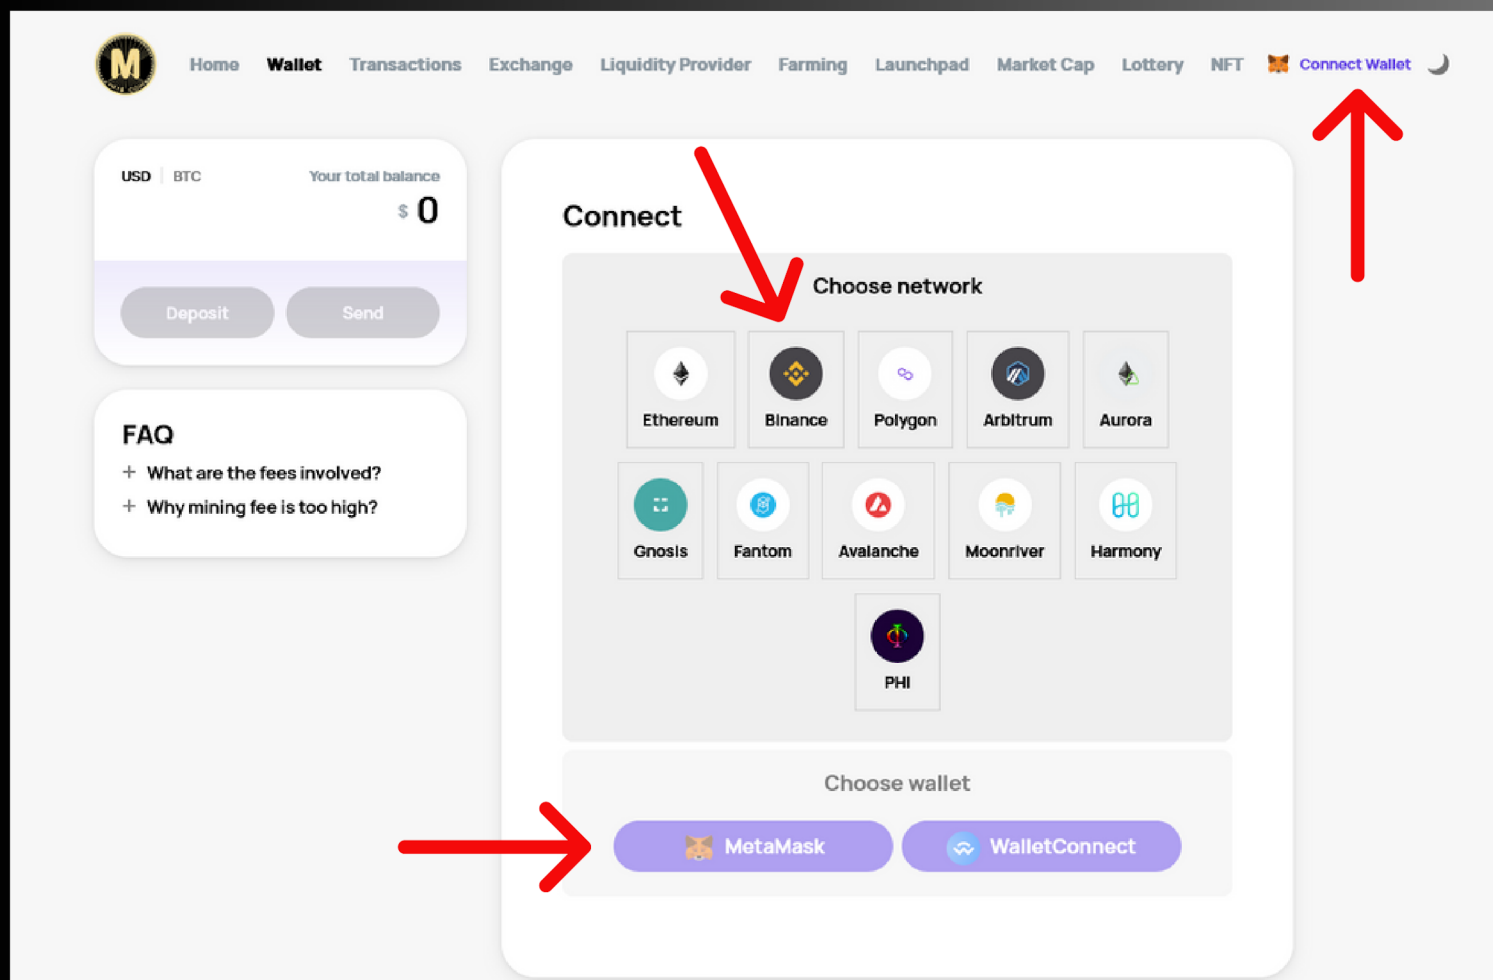

Decentralized Exchange

In this section you will find all the info with the relative screenshots to be able to operate on the DEX

By connecting to our exchange this is the first screen you will get.

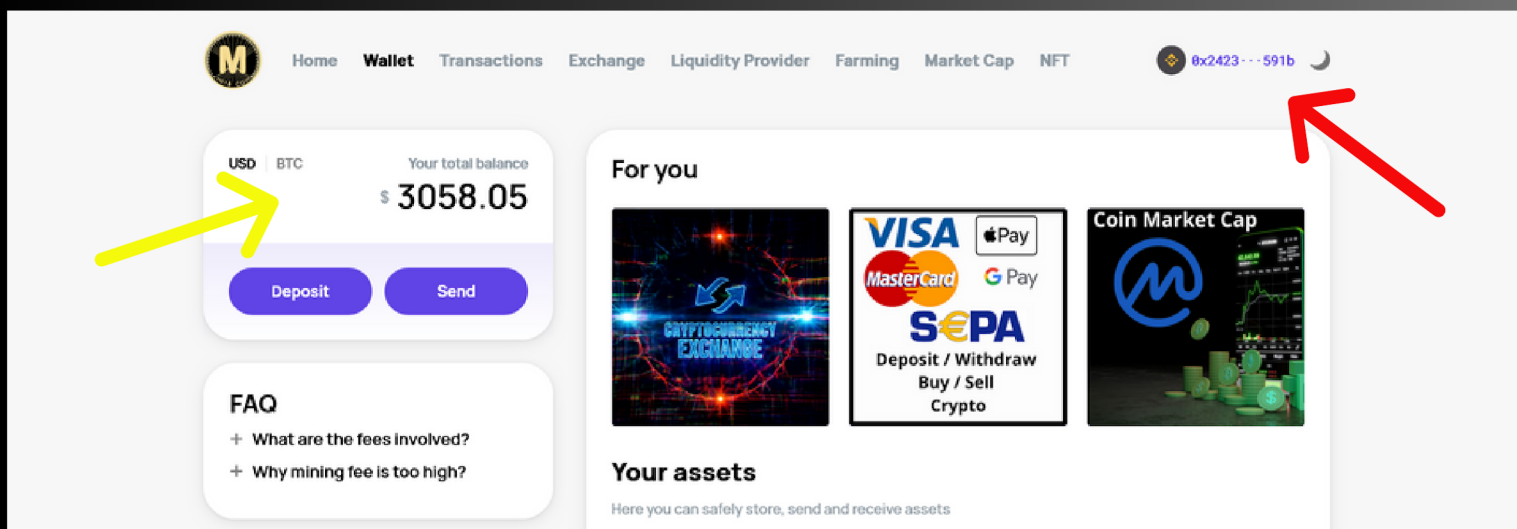

First go to the top right and give Connect Wallet by selecting the network you want to operate on and choose the wallet to connect.

If your wallet number does not appear immediately at the top right, refresh the page and you should be connected.

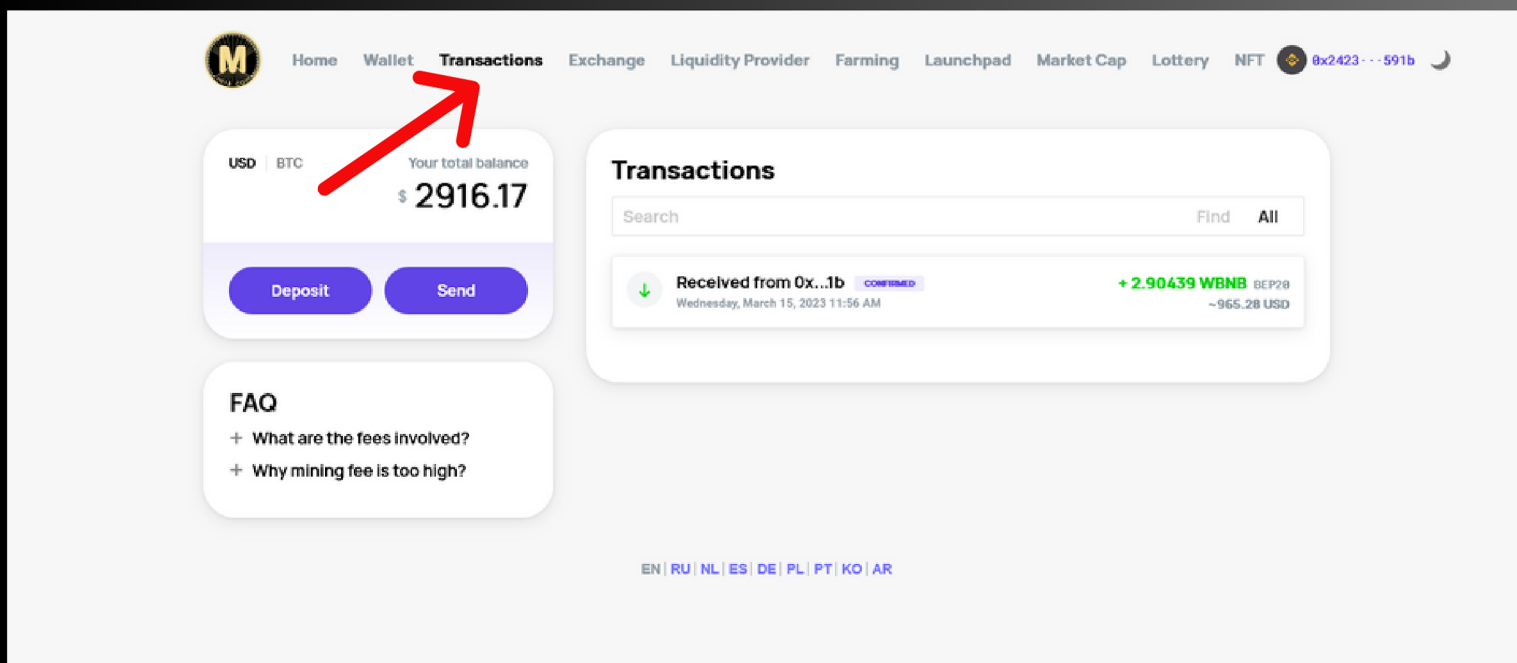

To be connected with your wallet it should appear as in the image below

At this moment you are connected with your wallet to the DEX.

The yellow arrow indicates the section where you see your total balance of all the tokens in the wallet in their respective value or in USD or BTC

At the top you will find the various links and if you click on **Transactions** the following screen will open where you can see all the transactions made from your wallet.

By clicking on Exchange, you enter the section dedicated to exchanges where you can swap your tokens.

Home Wallet Transactions **Exchange** Liquidity Provider Farming Market Cap NFT

Slippage tolerance ? : 0.5%

Service fee ? : 5%

Enter "You send" amount

Swap

In **Aggregator** you will exchange tokens through our nodes and our infrastructure, much faster and more reliable than the others.

Of course, in relation to the services offered there will be a small commission to pay but every commission we receive will be reinvested in staking farming creations or buy back on the MET\$ token

To give opportunities even to those who can't afford to pay commissions, we thought we'd give a second swap opportunity through **Pancake**, as being before us on the market, it can grant lower commissions. Therefore by clicking on **Pancakeswap** you will still be able to swap your tokens using our platform. Of course, by doing so you will not give other opportunities to earn through our other services.

Finally, in the **Setting** section you can set the various parameters present in the best possible way. Otherwise, if you don't change anything, the parameters set are the best ones by default

In the initial section **Wallet** you will still find the following functions. By clicking on **Coin Market Cap** you can have the quotes of all the tokens with the greatest capitalization updated every 5 minutes.

While if you click on the **VISA/Mastercard** banner you will be sent back to the cryptocurrency purchase and sale section through the use of credit cards, wire transfers, GPay and Apple Pay

In the **BUY /SELL CRYPTO** section, after the following steps, you can buy and sell all the supported cryptocurrencies.

We show you the various steps to take the first time to be able to do the KYC through our partner **TRANSAK**

© Meta Swap 2023

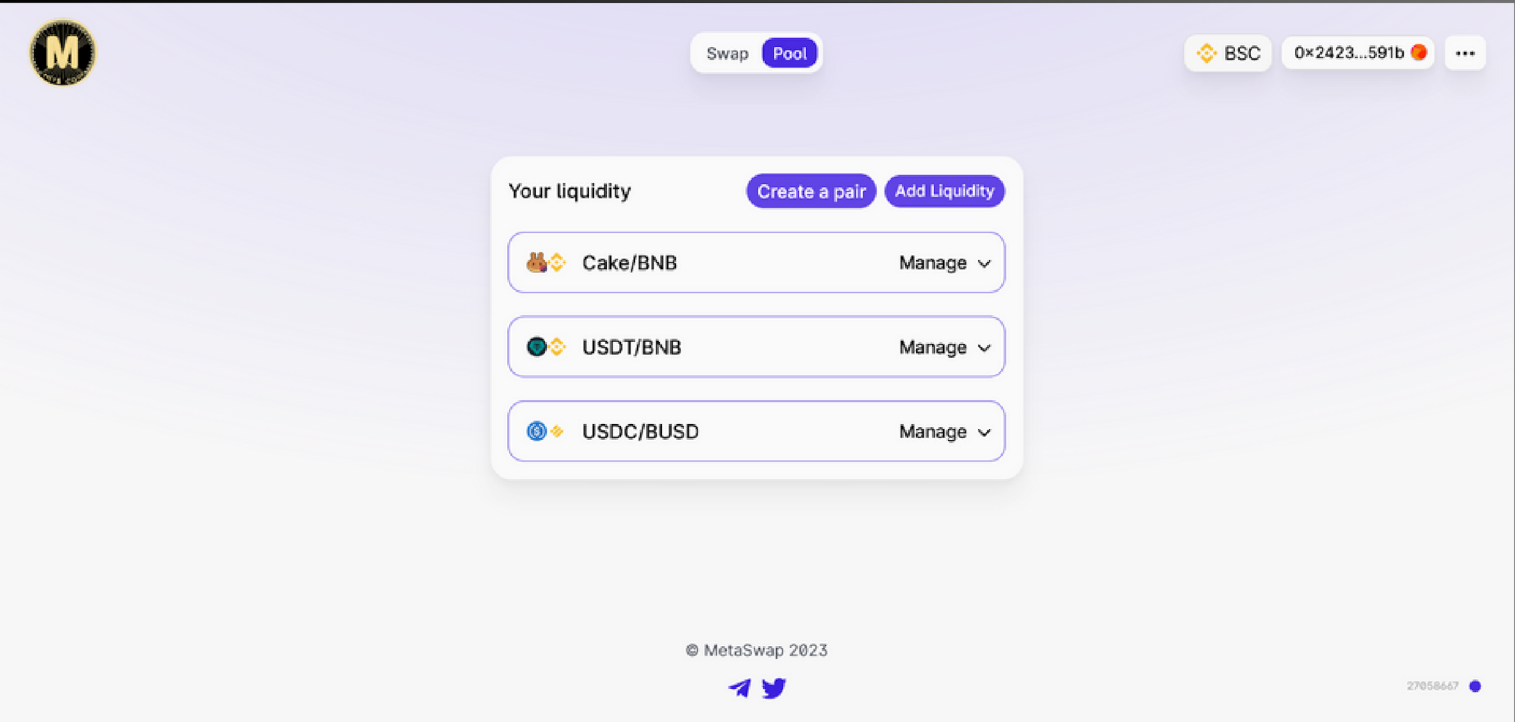

Liquidity Provider

Our internal Liquidity Provider is configured on the BSC network and we will also expand it on the ETH network. Once connected you will be able to swap your tokens on our pool based on the liquidity present. Each user can place the liquidity he wants on existing pairs or create other pairs and place liquidity

The swap commissions are very low equal to 0.5% and the liquidity once it is removed is restored to 99% as 1% remains as a reserve on the pair created.

The swap is very simple, you select the cryptocurrencies to convert and confirm the operation through your decentralized wallet

The interface shows a swap operation. At the top, there are tabs for 'Swap' and 'Pool', with 'Swap' selected. The network is set to 'BSC' and the wallet address is '0x2423...591b'. The swap details are as follows:

From (estimated)	Balance
0.338989	1.14703

Below the 'From' field is a 'MAX' button and a dropdown menu showing 'USDT'. A downward arrow indicates the swap direction. The 'To' field shows '0.001' with a balance of '9.39452' and a dropdown menu showing 'BNB'. Below this, the price is '338.989 USDT per BNB' and the slippage tolerance is '0.5%'. A large blue 'Swap' button is in the center. At the bottom, the following details are shown:

Maximum sold	0.3406 USDT
Price impact	3.23%
Liquidity provider fee	0.001694 USDT

The footer shows '© MetaSwap 2023' and a small blue dot.

To add liquidity to the pairs already present, just select the chosen pair and give ADD.

The interface shows the 'Pool' tab selected. The network is 'BSC' and the wallet address is '0x2423...591b'. The 'Your liquidity' section has two buttons: 'Create a pair' and 'Add Liquidity'. Below this, there are three liquidity pools:

Pair	Manage
Cake/BNB	Manage ^
Your total pool tokens: 0.1078	
Pooled Cake:	0.999999
Pooled BNB:	0.0116231
Your Pool Share:	100.00%
<div>Add Remove</div>	
USDT/BNB	Manage v
USDC/BUSD	Manage v

The footer shows '© MetaSwap 2023' and a small blue dot.

At this point, just add the amount of tokens based on your availability and give SUPPLY

Add Liquidity

When you add liquidity, you will receive pool tokens representing your position. These tokens automatically earn fees proportional to your share of the pool, and can be redeemed at any time.

Input: 0.00258104 (MAX) Cake (Balance: 0.292027)

Input: 0.00003 (MAX) BNB (Balance: 9.39452)

Prices and pool share

0.0116232 BNB per Cake	86.0348 Cake per BNB	0.26% Share of Pool
---------------------------	-------------------------	------------------------

Supply

Once given supply you will have to confirm the transaction through the wallet and once the transaction has taken place click on it and it will open the BSCscan where you can find the data to import your LP-Tokens

Farming

Meta Swap **Farming** gives the possibility to create staking farms for each token project. You can create as many staking farms as you like.

Each staking farm can be configured as desired based on demand.

The parameters that can be requested during creation are the following:

- Tokens to be staked
- Tokens to distribute
- Number of tokens to be redistributed
- Percentage of APY
- Duration of the farm (30/60/90/120 days or 1 year)
- Token logos

MET\$-MET\$

90 Day	0.3 BNB
120 Day	0.4 BNB
1 Year	0.5 BNB

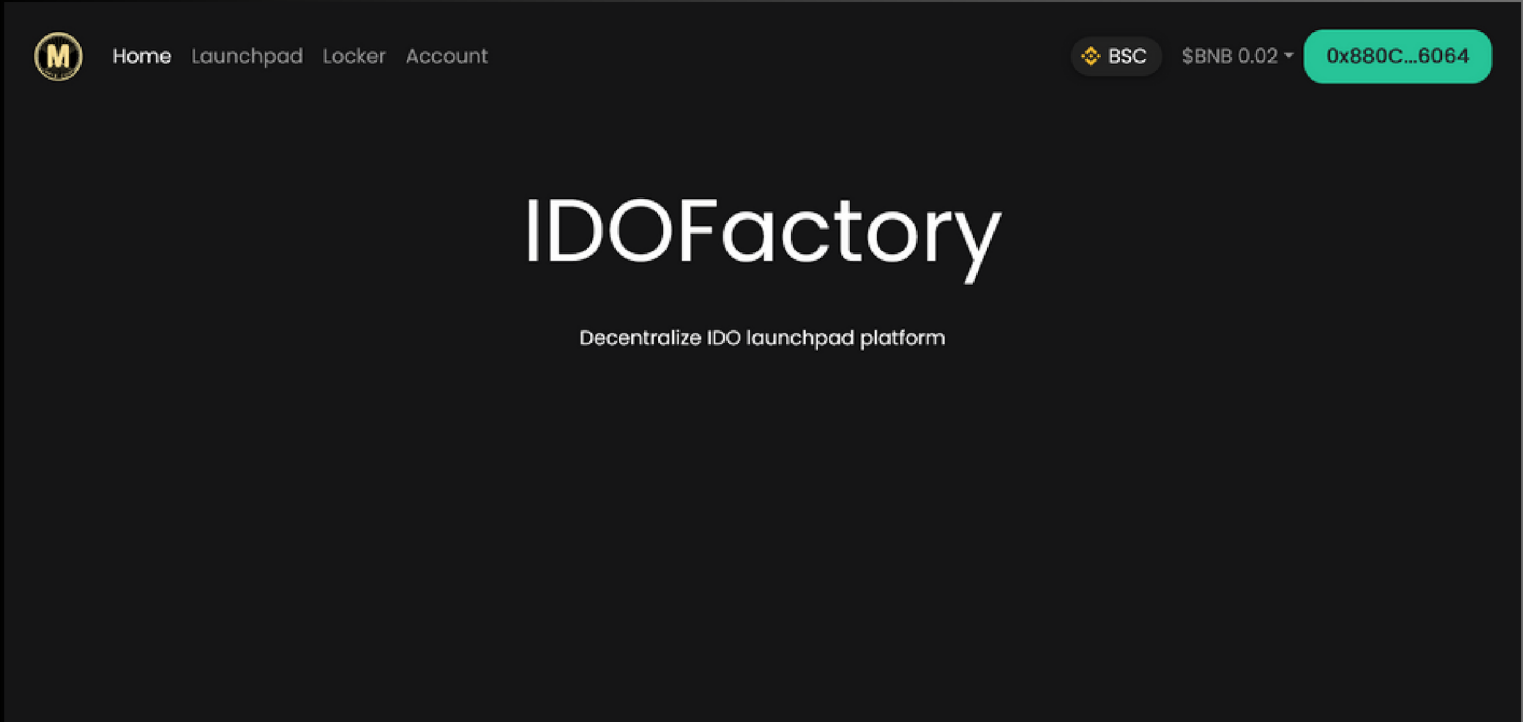

To request it, simply connect to the staking page and fill in and send the form that you will find at the bottom of the page.

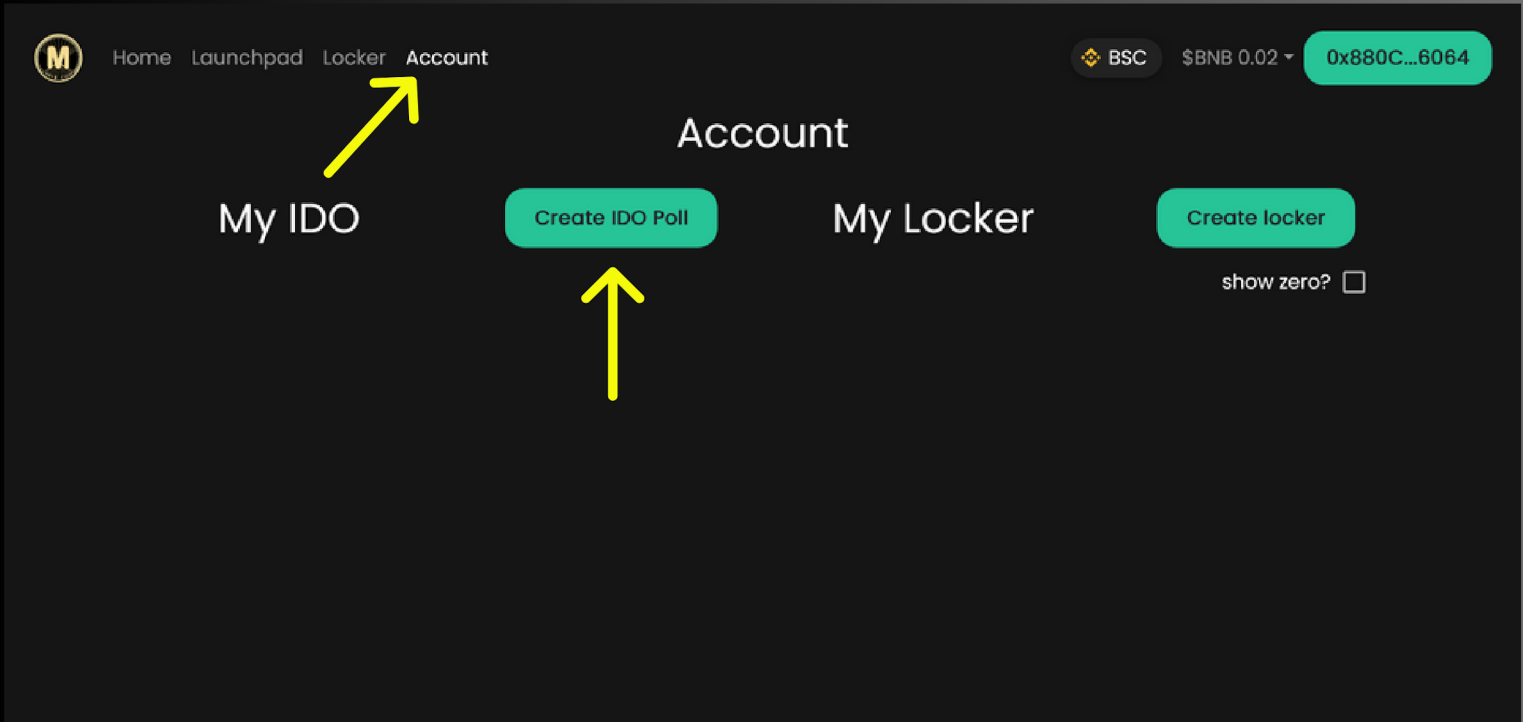

Launchpad

To provide a complete service, the **Launchpad platform** could not be missing, where any project can create the IDO/ICO and make Token Lock contracts for any vesting.

To create the IDO you have to click on the **ACCOUNT** button and once done click on the **CREATE IDO Poll** button

In the first **Token Verify** screen you will have to enter the contract number of the token you want to IDO. The name of the token, the symbol and the initial supply will automatically appear below. Continue giving **NEXT**

Lottery

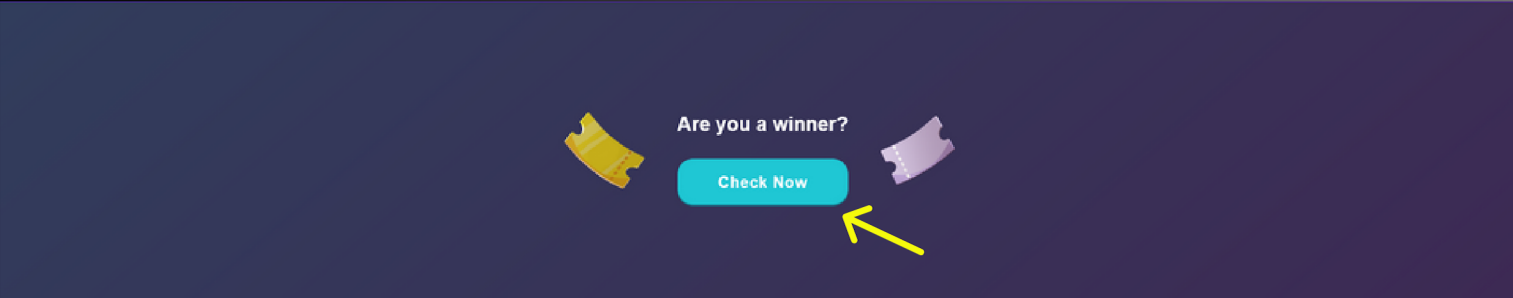

For all our users we have also thought of entertaining them by creating a monthly Lottery.

Each ticket sold is divided among the various winning possibilities as seen in the image, and a small part is burned.

If there is no winner at the time of the draw, or if part of the jackpot remains, then the amount of the jackpot will be put back into play on a next draw.

To see if you have won, just connect your wallet and click on the **CHECK NOW** button.

In the **Finished Rounds** section you will be able to see the numbers issued with the respective balls, you will also be able to see the totals of the winners for each Match

Finally, in the **How to Play** section you can read the rules relating to the Lottery

How to Play

If the digits on your tickets match the winning numbers in the correct order, you win a portion of the prize pool.
Simple!

STEP 1

Buy Tickets

Prices are set when the round starts.

STEP 2

Wait for the Draw

The timer is at the top of this page

STEP 3

Check for Prizes

Once the round's over, come back to the page and check to see if you've won!

Winning Criteria

The digits on your ticket must match in the correct order to win.

Here's an example lottery draw, with two tickets, A and B.

• Ticket A: The first 3 digits and the last 2 digits match, but the 4th digit is wrong, so this ticket only wins a "Match first 3" prize.

• Ticket B: Even though the last 5 digits match, the first digit is wrong, so this ticket doesn't win a prize.

Prize brackets don't 'stack': If you match the first 3 digits in order, you'll only win prizes from the 'Match 3' bracket, and not from 'Match 1' and 'Match 2'.

© Meta Swap 2023

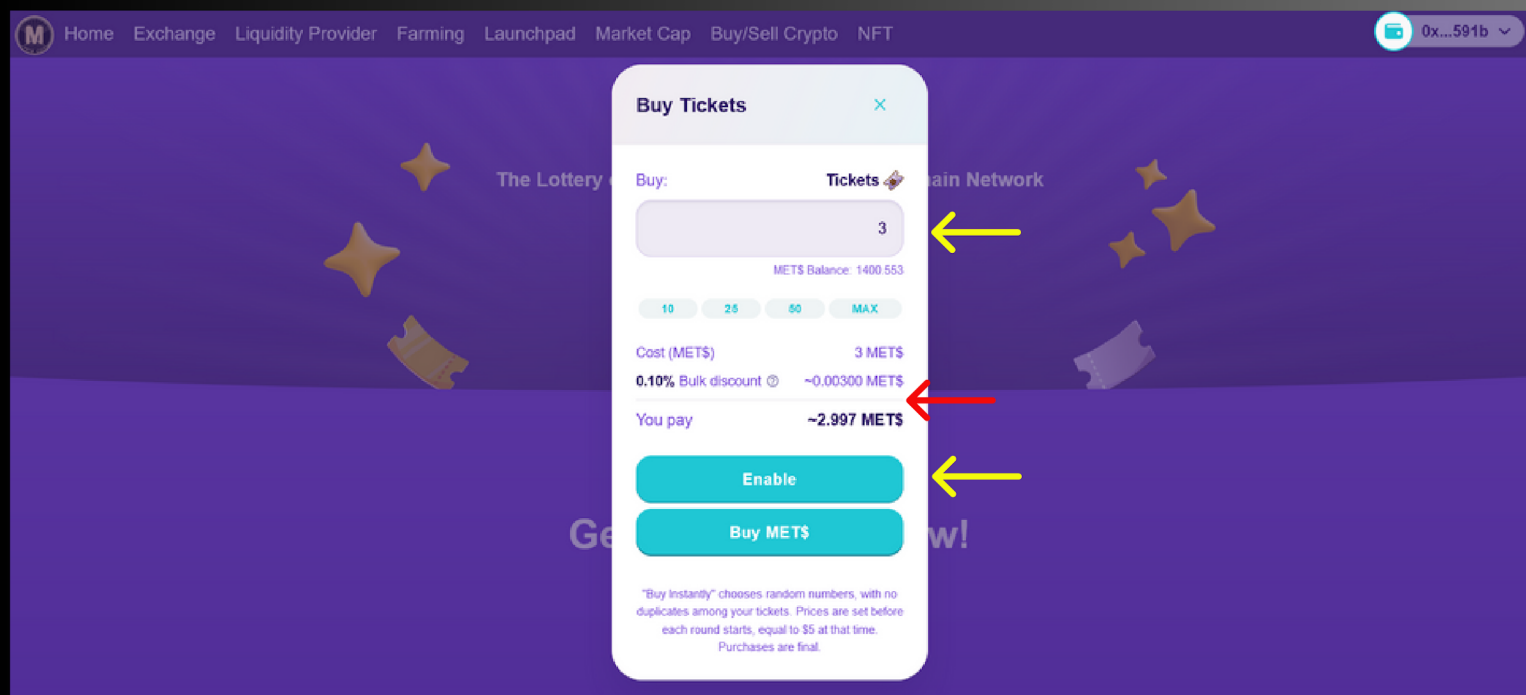

To buy tickets is very simple.
Once connected to your wallet, you have two possibilities.

- 1) For those who already have MET\$ tokens in their wallet, just click on the **BUY TICKET** button
- 2) For those who do not yet have MET\$ tokens on their wallet, they will have to click on the **BUY MET\$** button and they will be sent back to our exchange where they can buy them using BNB.
Once the MET\$ tokens have been purchased, he can return to the Lottery and **BUY TICKET**

When you click on the **BUY TICKET** button, an interface will open where you can enter the quantity to purchase in the first banner above.
Immediately below you will find the relative discount based on the number of tickets purchased and the **ENABLE** button on which you will have to click to approve the contract.

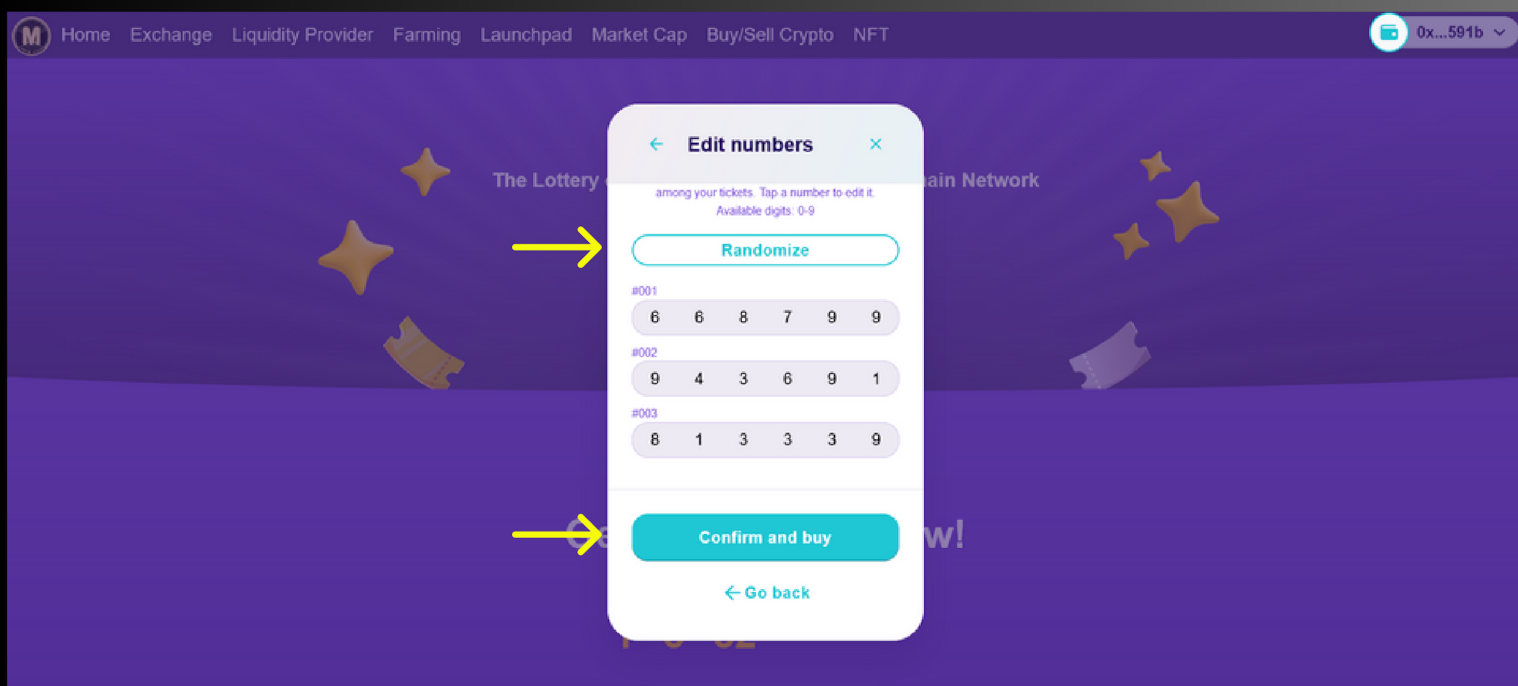

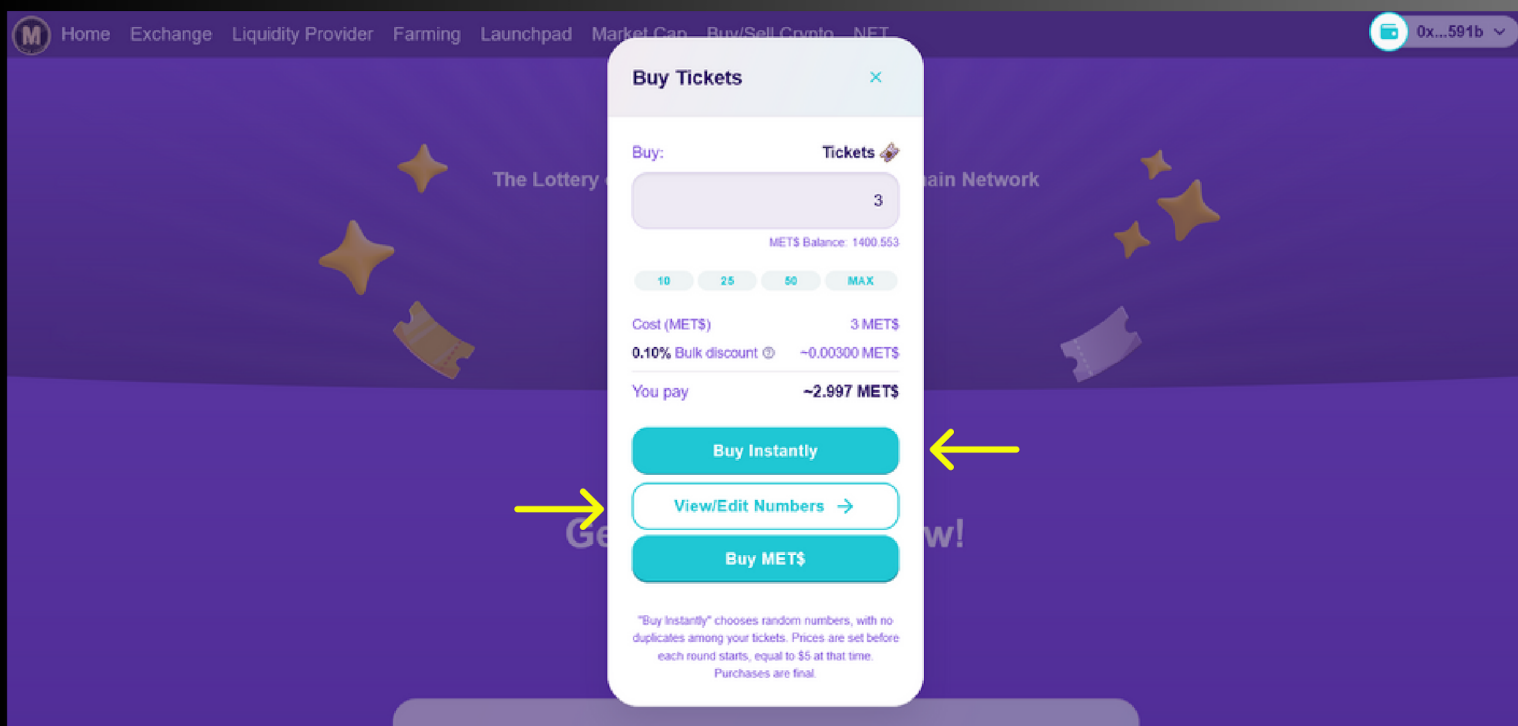

Once ENABLE has been given and the transaction has been confirmed, a second screen will open where you will have two possibilities.

1) Make an instant purchase by clicking on the **BUY INSTANTLY** button

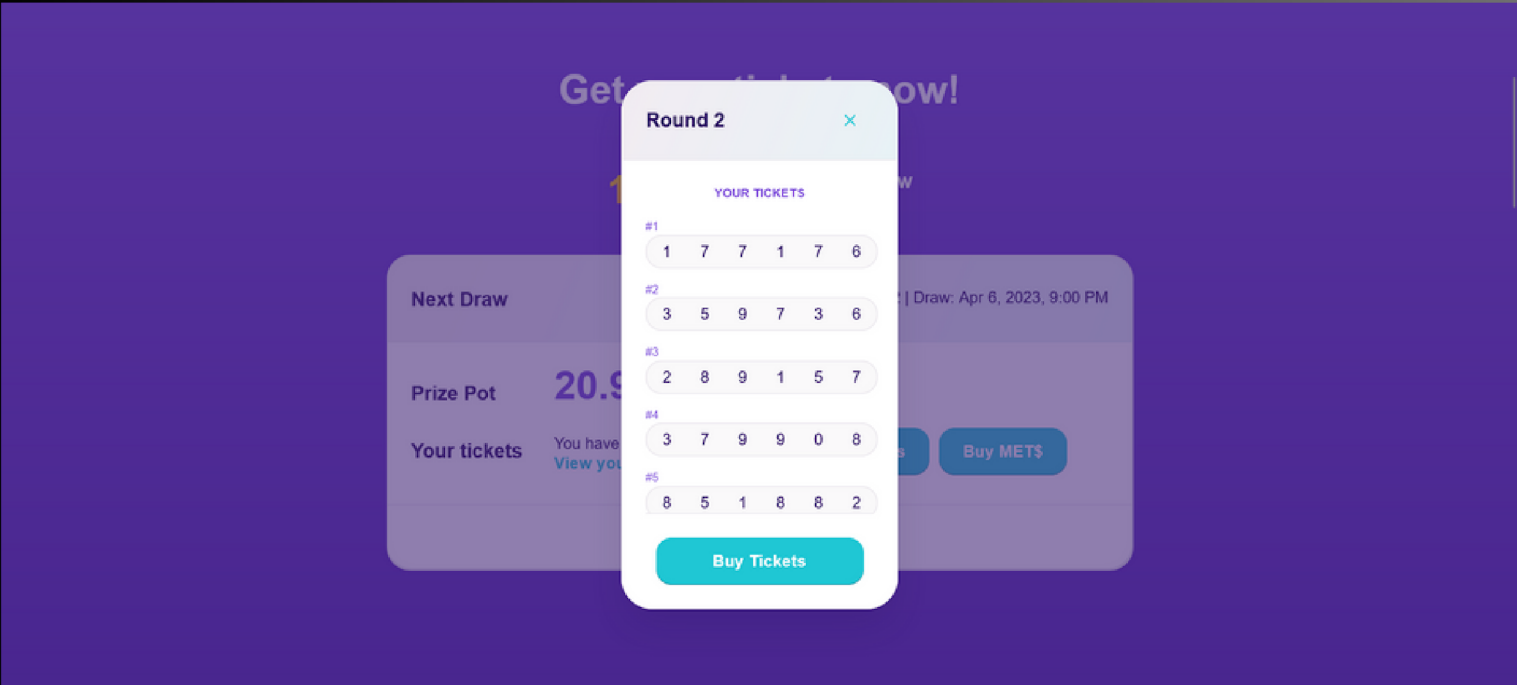

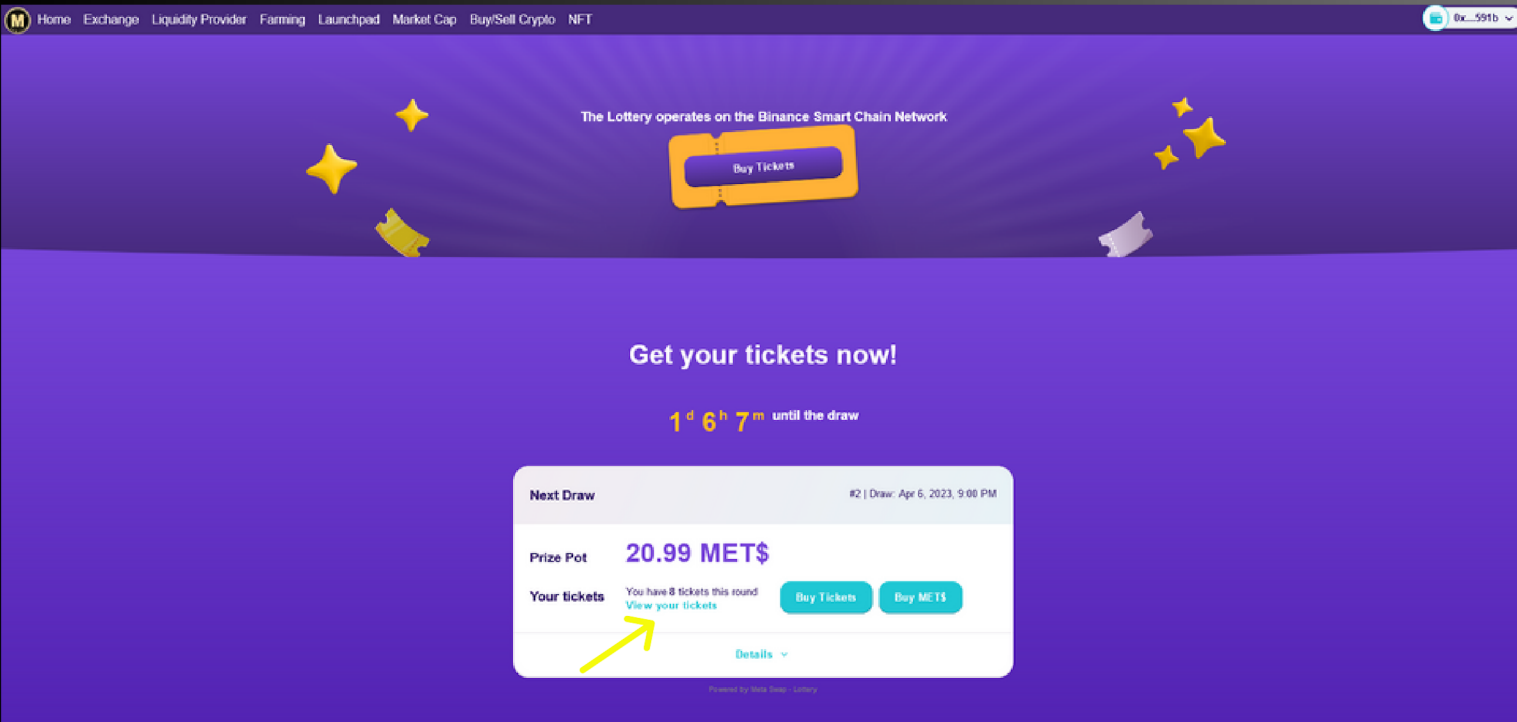

2) Click on the **VIEW/EDIT NUMBERS** button and a second screen will open where you can choose your favorite sextuplet by clicking on the **RANDOMIZE** button.

Once you have identified your favorite sextuplets, you will have to click on the **CONFIRM** and **BUY** button

Once the transaction has been confirmed, you will have purchased the Tickets and you can view them by clicking on **VIEW YOUR TICKET**

At this point, wait for the day of the draw and check if you have won.

Good luck !!!

MET\$ Token

The smart contract that gave birth to the MET\$ token was written line by line and no pre-formed library was used.

The contract includes these functions:

- Mint
- Burn
- Pause
- Unpause
- Freeze to
- Mint and Freeze
- Approve
- Transfer From
- Release All
- Decrease Approval
- Release Once
- Renounce Ownership
- Finish Minting
- Transfer
- Increase Approval
- Transfer Ownership

All the functions included in the contract have been specially designed to secure future investors in the event of problems of any kind.

The contract has been deposited on the BSC Chain and has been verified so that every user can go and read the code.

The contract has this number: **0xDd770074aa548B66Ab54CF0f6E67F9354E3b732e**

For those wishing to read it can connect directly to this link:

<https://bscscan.com/token/0xdd770074aa548b66ab54cf0f6e67f9354e3b732e#code>

To make the token more attractive to traders, no FEE has been set on buy and sell and it will never be possible to set, any as no function has been set for this purpose.

Therefore the FEE will always be 0%

The initial supply will be 100,000 tokens, as having the mint and burn function on the contract, it will be possible to manage both an increase or elimination the tokens in circulation.

Having created many services, the respective contracts were also created which have been verified and of which we will post the numbers to be able to go and examine them.

The only contract that we have deliberately not checked is the one relating to the Lottery as we believe it is unique and we cannot let anyone copy it.

MET\$ Token

FARMING / STAKING

Farming and staking do not include contracts that have already been deposited as they will be created and verified with each request received.

EXCHANGE

The exchange does not provide for the use of contracts, as the liquidity to carry out the transactions is taken directly from the following pools: QUIKSWAP / ANYSWAP / UNISWAP / PANCAKESWAP

The Meta Swap project is based on total decentralization therefore no data, no assets including cryptocurrencies and tokens will ever be managed, stored and archived on the Meta Swap servers. Everything will always and only be held by the user through his devices and decentralized wallets. Since the Blockchain is in the public domain, all transactions, movements and anything else can be visible by everyone and attributable to wallet numbers.

Since the whole project is in DeFi, each user will have to take care of their assets as their loss will in no way be recognized by the Meta Swap which, as mentioned above, will never hold any type of data.

This allows the Meta Swap to work in complete security, as today it is impossible to hack the blockchain and with it the contracts deposited.

Token Distribution

The initial supply will be : 150.000 MET\$

Divided as follows

- 40.000 MET\$ to Holders of MetaGiftCoin [MGC] and QR-Code [QRC]
- 30.000 MET\$ dedicated to pre-sales. Unsold ones will be burned
- 40.000 MET\$ placed in the Liquidity Pool
- 10.000 MET\$ added to the Liquidity Pool in October 2023 with related BNB unlocked by QRC
- 20.000 MET\$ for a creation of staking
- 10.000 MET\$ for marketing. They will be blocked with six-monthly maturities of 10%

Road Map

Q1- 2023

Infrastructure creation - DEX / Liquidity
Porvider / Farming / Staking / Launchpad /
Web site / Lottery / Smart contract

Q2- 2023

Presale tokens through launchpad
Distribution of token holders
Creation of liquidity in the pool

Q3- 2023

Implementing EVM chains on
Exchange / Launchpad / LP / Farming

Q1- 2024

White Paper emission in multilanguage
Marketing campaign
Beginning of DAO development

Q2- 2024

DAO platform launch
Social media marketing campaign
Telegram community implementation

Q3- 2024

Metaverse game development
Game test whit community

Q1- 2025

Activating games on the Metaverse
Listing request on BINANCE

Q2/Q3- 2025

Creation, development and launch of our
own Blokchain

Legal

The following White Paper consists of information given for discussion purposes only and does not represent investment advice of any kind.

Further, it does not constitute an offer to sell shares or securities nor does it constitute a solicitation to buy such shares or securities.

None of the information found within is intended to influence any investment decision nor should it be the basis of an investment decision of any kind. Investment advice for investment in any security, or any tax or legal advice should only be given by an investment advice firm, and Meta Swap is not an investment advice firm. Meta Swap encourages readers to seek appropriate and independent professional advice to inform themselves of the legal requirements and tax consequences of any investments they make, both within Meta Swap and within the Blockchain industry as a whole.

Investments should only be done with the help of an independent financial advisor within context of the countries of their citizenship or residence, and their place of business with respect to the acquisition, holding or trade in Meta Swap or any other tokens.

Please note that this White Paper does not constitute an offer to sell, or the solicitation of an offer to buy, for any person for whom it may be unlawful to participate in a token sale.

Those for whom it is unlawful to participate should not participate.

Consult with your own lawyer or accountant to determine whether it is lawful for you to participate in this token sale.

This White Paper should in no way be construed as being intended to create a contract for investment.

This White Paper (edition 1.0) may be revised, with the newest edition always appearing on our website.

For each revision cycle, we will provide notes on what has changed the justification for the change.

Updated versions of the White Paper (as indicated by consecutive edition numbers) may contain information which may override, clarify or contradict previous editions, in which case the latest version should be considered the most accurate and up to date.

Because of this, versions which are found outside of the official Meta Swap website may contain out-of-date or inaccurate information.

The most up-to-date version of the white paper can be located online at
